

I received notice the FCC is proposing to expand the LPFM service in a way that will allow LPFM stations to take priority over current FM translator service. This will affect my ability to listen to the only radio service I listen to any more: K-LOVE, which is heard on 89.3, 100.7, and 91.9 in North Dakota. I believe K-LOVE radio does a great service to our community and the country in general because it gives people the opportunity to listen to good Christian music and the ministry provided by K-LOVE with their on-staff pastors give counseling and prayer to many people in need. If any of you at FCC have assured your place by our Father in Heaven by accepting Jesus as your savior, you will have to agree that removing this public service, completely listener supported, from the air waves would be criminal. Thank you for your time and I'll be praying for you all.
